Meade lx200 8 inch images

Taken with Meade LX200 8" Schmidt-Cassegrain telescope and eyepiece shot with iPhone. Saturn is the sixth planet from the Sun and the second-largest in the Solar System, after Jupiter. It is a gas giant with an average radius of about nine and a half times that of Earth. It only has one-eighth the average density of Earth; however, with its larger volume, Saturn is over 95 times more massive.
